“I again chose Anthos dental units for my new practice as they proved to be highly reliable at the old practice,” Dr Hollander said. “Patients are also loving the extra comfort upholstery on the dental chairs we opted for this time. Anthos in Australia supplied and installed the equipment and their service is first rate. If there is ever an issue, we just call and they’re on-site to fix it. This time, we went with MyRay imaging equipment throughout, which is a sister brand to Anthos and this has also proven to be an excellent choice. From my perspective, I was looking for reliability, dependable service and competitive pricing and Anthos ticked all the boxes.”

“Anthos Australia installed my first Anthos dental chair in 1997, which served me well for many years. Over the past 18 years Anthos equipment backed by sound service support have been an integral part of the Smile Solutions clinical success. Today we have over 50 Anthos dental chairs in our practices and would have no hesitation in recommending Anthos to any prospective purchaser.”
